Professional Summary

Enterprise-focused Java Full Stack Developer with hands-on internship experience engineering scalable, secure, and distributed web architectures using Java, Spring Boot, Spring Security, Microservices, and the React.js ecosystem. Proven expertise optimizing database performance layers, designing high-throughput RESTful APIs, and implementing stateless JWT identity management infrastructure. Currently pursuing an MCA specialized in AI and Machine Learning to bridge advanced algorithmic computing with standard enterprise software engineering practices.

Technical Skills

Languages: Java (Core Java, Java 8, Java 17), JavaScript, SQL

Backend Engineering: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, RESTful APIs, Microservices

Frontend Architecture: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, React Router, Axios

Databases & Tools: MySQL, PostgreSQL, Maven, Gradle, Postman, Docker, Kubernetes, AWS, Linux, Git, GitHub

Core Methodologies: OOP, Design Patterns, Collections Framework, Data Structures & Algorithms (DSA), SDLC, Agile (Scrum)

Professional Experience

ARC Technologies and Institute

Nagpur, India

Full Stack Java Developer Intern

Aug 2025 – Present

- Architected full-stack web applications using Java, Spring Boot, and React.js, shipping 10+ highly reusable, responsive UI components to optimize client-side modularity.
- Spearheaded the deployment of 15+ secure RESTful APIs, integrating asynchronous frontend workflows via Axios and JSON to facilitate seamless data exchange.
- Mitigated system security vulnerabilities across 6+ core CRUD modules by implementing robust, stateless JWT-based authentication and authorization protocols.
- Streamlined MySQL database performance and index strategies, driving an approximate 20% reduction in average API response latency.
- Executed software deliverables within a 4-member Agile team using Git-based version control, accelerating code quality via structured pull requests and peer reviews.

Cognition Technology

Pune, India

Java Backend Developer Intern

Dec 2022 – Aug 2023

- Formulated enterprise backend modules for a production-grade Job Application Portal utilizing Java, Spring Boot, Hibernate, and MySQL topologies.
- Provisioned 20+ robust RESTful APIs powering high-volume candidate registration, job posting, and application management lifecycles.
- Integrated efficient data persistence models using JDBC and Spring Data JPA, ensuring transactional integrity across 10+ relational database tables.
- Accelerated application throughput by approximately 30% through targeted SQL query optimization and backend Java performance tuning.
- Enforced strict role-based access control policies across the application tier by integrating Spring Security frameworks and JWT tokens.
- Partnered directly with frontend engineers to align API contracts, seamlessly coupling backend services with client-side React.js components.

Projects

Job Application Portal

Java, Spring Boot, React.js, MySQL, Spring Security, JWT

- Engineered a full-stack recruitment ecosystem featuring secure, multi-tier authentication mechanisms built for 3 distinct user roles.
- Consolidated core operational workflows for job posting, search engine utilities, resume uploads, and application tracking across 6+ CRUD modules.
- Secured 15+ backend endpoints end-to-end by implementing Spring Security filters and validated JWT access control blocks.
- Designed a highly normalized MySQL database schema spanning 10+ tables to support scalable, long-term data management.

Student Management System

Java, Spring Boot, React.js, MySQL, Axios, Postman

- Implemented a full-stack CRUD application built to manage student registration and academic profile lifecycles across 12+ intuitive screens.
- Standardized compliant RESTful APIs and verified payload exchanges in Postman before integrating components with a React.js client via Axios.
- Automated field-level input validation and centralized exception-handling routines across all repository operations to prevent database state corruption.

Hotel Management System

Java, Spring Boot, MySQL, RESTful APIs

- Delivered modular backend services for comprehensive room booking, dynamic reservation state tracking, and historical guest

- record maintenance.
- Constructed performant CRUD operations combined with global exception handlers to streamline data persistence and safeguard MySQL transaction processes.
- Modernized legacy backend layers into an extensible, interface-driven architecture to facilitate scalable future feature enhancements.

Education

Chandigarh University

Master of Computer Applications (MCA) – Specialization in AI & Machine Learning

India
2024 – 2026

Sant Gadge Baba Amravati University

Bachelor of Vocation (B.Voc.) – Software Development

India
2019 – 2022

Certifications

- Java Developer Certification – Cognition Technology, Pune
- Strategic Human Resource Management – Amity University
- Harvard ManageMentor Professional Certifications: Team Management, Decision Making, Presentation Skills, Business Plan Development
